LET'S BUILD THE WORKSPACE OF THE FUTURE: SEIZE THE INITIATIVE WITH BYTES AND CITRIX

Citrix enables you to build the digital workspace of the future — harnessing the agility of cloud without any complexity and security concerns slowing you down. As a Citrix Gold Partner with a 20-year track record, Bytes is perfectly placed to help you succeed.

Unified, contextual, and secure: Take control with Citrix Workspace

Citrix Workspace integrates diverse technologies, platforms, devices and clouds, so it's flexible and easy to deploy. You can adopt new technology without disrupting your existing infrastructure.

IT and users can co-create a context-aware, software-defined perimeter that protects and proactively addresses security threats across today's distributed, multi-device, hybrid and multi-cloud environments.

Deliver cloud solutions quickly and simply for your digital workspace

Microsoft

What's possible?

⊘ Cloud-based management and provisioning for Citrix-hosted Windows Virtual Desktops and apps from multi-session Windows machines

⊘ Managed Azure IaaS, including Azure compute, storage, and networking for delivering virtual desktops

With over half a million joint customers, Microsoft and Citrix are uniquely positioned and aligned to empower a cloud-enabled, mobile workforce. Citrix technology benefits from deep integration with Microsoft server and desktop operating systems and management tools.

Citrix Managed Desktops is the simplest, fastest way to deliver Windows apps and desktops from Microsoft Azure. The Citrix Managed Desktops solution offers cloud-based management, provisioning, and managed capacity for delivering virtual apps and desktops to any device.
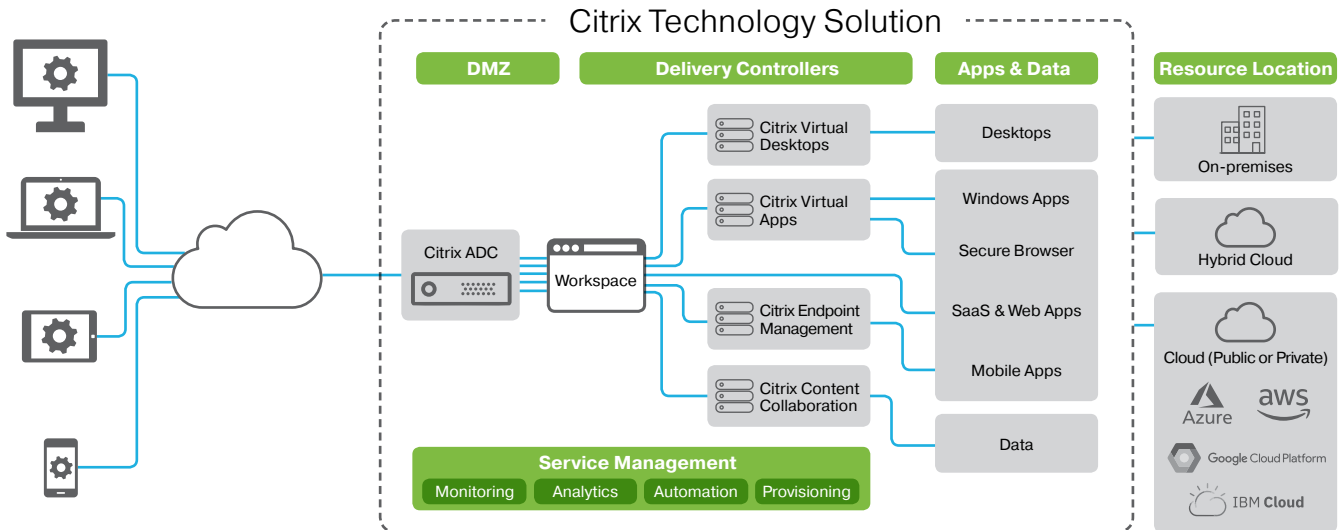

Users get a high-definition user experience from a broad range of devices, using the Citrix Workspace app. Meanwhile, IT teams benefit from best-in-class security, scalability, management and performance of enterprise software and online services.

A Smart **Cloud Investment Strategy**

Digital workspaces with reliability, speed and security

Citrix provides the fastest, simplest and most flexible way to securely manage digital workspaces - so you can maximise user productivity in an increasingly mobile business world.

You can reduce cost and complexity, while creating workspaces quickly on any cloud or infrastructure. Simply integrate technologies, platforms, devices and clouds to simplify IT management, while delivering personalised access to the systems and tools your users need in a contextual and secure way.

Citrix Technology Solution

DMZ	Delivery Controllers	Apps & Data	Resource Location

- Citrix Virtual Desktops — Desktops

Data

Service Management
Monitoring | Analytics | Automation | Provisioning

Resource Location:
- On-premises
- Hybrid Cloud
- Cloud (Public or Private) — Azure, aws, Google Cloud Platform, IBM Cloud

Take a closer look at the features of Citrix Workspace:

Application Virtualization & VDI means secure delivery of Windows applications and desktops to any device.

Citrix Networking ensures performance, visibility and security for your IT team in a hybrid and multi-cloud world.

Citrix Analytics applies machine learning to deliver actionable data across network traffic, users, files, and endpoints.

Enterprise Mobility Management enables endpoint security for device and applications, including BYOD and Office 365.

File Sync & Sharing enables easier content collaboration with secure, enterprise-grade data sharing and sync services.

Citrix Cloud Services simplifies the delivery and management of the Citrix portfolio of products and lets you scale with ease.

Bytes will accompany you on your journey with Citrix

With our close relationship with Citrix and decades of experience, Bytes is uniquely placed to help with everything from design to deployment, virtualisation to licensing. Let's discuss your goals and see how you can achieve them in the most effective way with Citrix.
