IT Products SKUs Overview

Okta Inc.
301 Brannan Street
San Francisco, CA 94107

IT Products SKUs

Single Sign-on

SSO (5, 10, Unlimited OIN)

Includes core capabilities of authentication, federation, directory integration, reporting, basic MFA, basic access policies and basic directory capabilities to store users and passwords. Directory integration enables delegated authentication to an external directory and/or syncing of user profiles and attributes. Federation includes inbound from an external SAML Identity Provider or outbound to applications or other federation service providers. Includes the Okta out-of-the-box admin experience, end-user web app and Okta Mobile app. Includes pre-built app integrations for single sign-on to public SaaS applications with the Okta Integration Network. Includes Okta Verify OTP and PIV/CAC support.

Adaptive SSO

Includes all core SSO capabilities as well as more sophisticated access policies that control access to your app or federated applications based on contextual access signals including network, device, and location context.

Universal Directory

Includes full set of capabilities around storing users and managing the user profile. Also includes self-service password reset of Active Directory passwords for end-users and cloud based LDAP authentication.

Adaptive MFA

Okta Adaptive MFA provides secure multi-factor authentication for employees, contractors, and partners.

MFA

Implement a variety of different factors for authentication including Okta Verify, SMS, Email, Voice, U2F, and 3rd party factors (such as Yubikey).

Adaptive MFA

Create intelligent policies based on login context that limit identity challenges to risky login attempts. Adaptive MFA evaluates network, device, and location context to drive authentication and access policies.

API Access Management

Support modern application development, with apps that are built to request data from an external resource, or call an API for executing some functionality outside of the client application. Support OAuth 2.0 authorization.

Lifecycle Management

Any IT Products Lifecycle Management SKU adds all the core capabilities of the Lifecycle Management product, including group membership rules. All other features can be purchased either with the full "Unlimited" SKU or one of the a la carte SKUs below. The chosen SKU additionally provides the noted number of Okta Integration Network provisioning integrations.

1, 2, 5, 10, Unlimited OIN

IT Products Lifecycle Management OIN app SKUs provide access to the Okta Integration Network integrations for provisioning, with the maximum noted number of integrations deployed.

Custom Integrations

Provides access to the SCIM interface and on-prem provisioning agent and SDK for custom provisioning integrations.

Advanced Mastering

Provides access to the capability to master from applications, either OIN applications or custom integrations. One OIN integration is included with purchase of this SKU to use for mastering. Mastering from a custom integration requires purchase of the Custom Integrations SKUs as well.
