

Bytes Managed Backup as a Service

Whether your environment is small or large, single or a global multi-site, our services will assist in removing the day to day headaches, overhead and complexity.

Bytes Backup Services provide a secure and scalable data protection platform for your file systems, applications and virtual server data to be protected and recovered in the event of data loss or corruption.

Our 24x7 service delivers a cost-effective option with multiple tailored offerings for all data types, coupling cost predictability with flexible data retention options. Both backup systems & IT infrastructure are fully managed and highly configurable, with agile implementation & support to align with your business requirements.

All Bytes services are backed with a **24 x 7 x 365 service desk** and **proactive monitoring** to ensure the solutions run optimally.

Optimised for performance, cost & data storage efficiency

24/7 Protection

Our Expert engineers monitor and protect your data 24 x 7 from our UK based service desk

Secure UK Datacenters

All of our Data Centers are ISO 27001, PCI compliant, Tier 3 ensuring a truly secure environment

On-prem/Cloud or Hybrid
