OUR ACCREDITATIONS

Our Workshops

We want to share our knowledge with you so you can get the most out of your IT environment. We offer a number of customised advisory, planning and design services to suit every business – curated by our in-house specialists.

Microsoft Azure Workshops

If you're looking for best practice advice in advance of deploying Azure or wanting to develop your solution further, our Azure workshops - delivered by our in-house cloud team - are the perfect starting point.

Office 365 & Microsoft 365 Workshops

It can be difficult to work out whether Office 365 or Microsoft 365 is right for your organisation. This free workshop will help you decide and get your business on the right track.
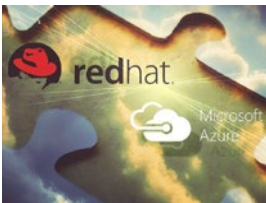

Cloud Security Alignment

Understanding your security posture and factoring in the shared responsibility model is essential to delivering a secure service whilst leveraging the many benefits of the cloud. This free workshop will help you get the balance right.

Infrastructure Modernisation

On-premises, hybrid or cloud? Whatever your environment, this workshop will help you to modernise your IT infrastructure and fine tune your business and IT strategy.

Red Hat Discovery Workshop

Bring scalability, flexibility, security and performance to your Oracle workloads while reducing the cost of infrastructure management. Our free of charge scoping & discovery workshop will help you to get started.
