Quantum Backup
for Microsoft 365

Protect your Microsoft 365 data against accidental deletion or malicious attacks, with our quick to install and configure Quantum Backup service powered by RedStor.

Complete Visibility

✔ Understand your 365 storage usage across **regions, business units, organisational functions, teams and individuals**

✔ Current 365 storage usage by **workload views**

✔ **Clear tracking and visibility** of how your storage requirements are changing over time

✔ **Indicative pricing** for storage at a glance with simple deployment within minutes

Environment Backup Summary

1.82K GB of data stored across all platforms

Total backup cost of **£546.36** per month

816 Total OneDrive Storage (GB)		**104** OneDrive Accounts	**£245** Backup Estimate
875 Total Email Storage (GB)		**126** Outlook Mailboxes	**£262** Backup Estimate
122 Total SharePoint Storage (GB)		**110** SharePoint Sites	**£40** Backup Estimate
9 Total Teams Storage (GB)		**34** Teams Sites	**£3** Backup Estimate

Benefits

✔ **Pricing based on actual storage required** not number of users or entities across your domain

✔ **Integrated into your licensing and actual employee utilisation**, to help you better manage joiners, movers and leavers. One simple cost.

✔ Back up for your 365 environments and **extendibility to cover your wider cloud** and on-premises environments

Key Features

✔ **Standard back retention of 2 calendar months** – covering daily and month-end backups

✔ Faster backups through the use of **smart compression**, that is typically **5-6x smaller** than hardware-dependent solutions

✔ **Faster Recovery through InstantData**, a unique, data-streaming technology, eradicates the need to wait for a full recovery.

✔ **Access critical data on demand**, wherever it's stored and be up and running in seconds.
